

Lead English Literacy Growth In Your Region

Become a Lexile® Framework for Reading Distributor

Represent the Global Standard for Reading Development

Millions of learners around the world use the Lexile Framework for Reading to build English literacy skills. Lexile® measures provide a common, research-based scale that helps educators understand progress, align instruction, and connect learners with challenging reading materials as their skills grow.

MetaMetrics® is seeking mission-aligned partners to expand access to Lexile measures and help more learners advance their English literacy.

A Partnership for Growth and Impact

By combining MetaMetrics' research-based reading framework and global leadership with your regional expertise and relationships, we can expand access to high-quality reading measurement and help English learners reach their full potential.

Why Partner with MetaMetrics?

Advance Your Literacy Mission

Help schools, language programs, and education organizations deliver more effective reading instruction and learner support.

Represent a Globally Respected Brand

Become the regional face of the world's leading framework for reading development.

Expand Your Market Impact

Support adoption across publishers, schools, ministries of education, assessment providers, and edtech organizations. Increase use of your products and services among students, parents, and teachers.

Create New Revenue Opportunities

Deliver high-value literacy solutions while expanding your portfolio through assessments, measurement services, and educator supports.

Drive Measurable Outcomes

Empower education organizations to track growth, inform instruction, and improve literacy outcomes.

Partner Spotlight

- Research and psychometric expertise
- Global brand leadership
- Product innovation and support
- Sales enablement resources

Partners Provide

- Local market presence and expertise
- Delivery and integration capability
- Lexile Framework advocacy
- Regional customer support
- Growth commitment

Why the Lexile Framework Matters for English Learners

A Common Measure of Reading Development Aligned to CEFR

A shared scale that helps educators, learners, and families understand reading progress over time and forecast growth based on custom regional reading targets. Lexile measures add a numerical layer to Common European Framework of Reference (CEFR) descriptors, making them more objective and actionable.

Instructional Alignment

Connect learner ability with appropriately challenging texts, content, and learning experiences. One of the most powerful components of the Lexile framework is the alignment of content libraries that target the optimal zone of development for each individual learner.

Meaningful Growth Insights

Lexile measures provide a more continuous view of English reading development with actionable information for instruction. Lexile measures help forecast how a learner's skills will develop, so teachers and parents know beginning readers are on track for fluency.

Ecosystem-Wide Consistency

A trusted measurement framework used across assessments, instructional content, and digital learning platforms. Lexile measures ensure student reading ability and instructional content are measured on the same scale.

Global Impact

The Lexile Framework for Reading is the global standard for reading measurement, trusted by leading assessment providers, publishers, schools, and education agencies worldwide

 **35M+**

students receive
Lexile measures
annually

 **100M+**

books, articles, and
digital resources
measured

 **100+**

countries around the
world have students with
access to Lexile measures
