

Growth Planner

Forecast Growth. Inspire Futures.

The Lexile® & Quantile® Growth Planner helps educators, parents, and students connect classroom performance to long-term growth. By forecasting reading and math development, Growth Planner transforms every assessment into an opportunity to plan, personalize, and prepare for the future.

Unlock the Power of Prediction

Growth Planner empowers partners, and educators using their platform, to:

- **Make every test count:** Use Lexile and Quantile measures from interim assessments starting as early as kindergarten to project student growth.
- **See the path ahead:** Forecast academic trajectories from grades 3 through 12.
- **Act early:** Identify at-risk students and support timely interventions.
- **Support long-term goals:** Track progress against college, career, and custom readiness targets.

Key Benefits for Partners

Lexile and Quantile Growth Planner is powerful and flexible, providing benefits to a range of education solutions. When you illuminate the path forward with reliable, trusted forecasting tools, educators and families can better support students in achieving their dreams.

What's New More Insights, More Impact on Growth

Enhancements include:

Interim-enabled

Accepts multiple interim measures per school year, starting in kindergarten.

Flexible Visualization

Choose between our ready-to-use graph or build your own using the data provided.

Customizable Ranges

Focus projections on the grade spans and targets that matter most.

Assessment Providers

Enhance your offering with growth insights built on the global standard for reading and math measures. Make learning data actionable and inspire students to engage in their learning.

Tutoring & Intervention Companies

Identify at-risk students, tailor supports for each student, and demonstrate measurable learning results, proving the effectiveness of your product or service.

Career Readiness Platforms

Connect growth projections to career pathways with our bundled Career Data API, giving students a clear view of how their reading and math growth paves the way to meet future goals.

Pairs Well With: Lexile & Quantile Career Data APIs

Did you know we offer career data for high-growth careers that includes entry-level math and reading demands, degree requirements, and salary? By bundling Growth Planner with Career Data APIs, you can:

1. Align student growth with the demands of 600+ in-demand careers (national or by state)
2. Help learners set meaningful, realistic goals
3. Enable educators to link academic performance to workforce readiness

Transforming Test Results Into Roadmaps

Growth Planner APIs transform Lexile and Quantile measures into long-range forecasts that educators and families can use immediately. By combining inputs with MetaMetrics' research-based growth algorithm, the system delivers clear, actionable outputs that show progress toward readiness targets.

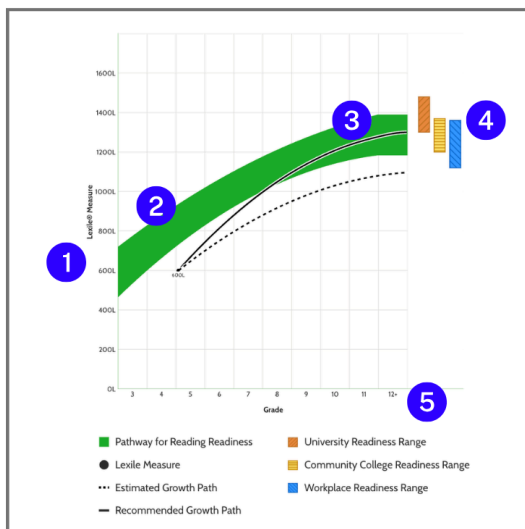

Inputs you provide:

- Lexile or Quantile measure
- Grade level
- School year start month
- Test date

Outputs you receive:

- Growth graphs that can include estimated paths through grade 12 and historical data points down to K (interim) or 3rd (summative)
- Default college or career readiness ranges or up to 3 custom targets
- Labels available in English or Spanish
- Recommended growth path and/or pathway to readiness band (if additional requirements met)

Graph Elements

Graph Options

1. Labels for "Grade" and "Measure" on the x and y axes can be made available in English or Spanish
2. Only if CCR target ranges are used does the *Pathway for Readiness* appear on the graph
3. *Recommended Growth Curve* is available with the default graph and is conditional on the student's trajectory being outside of the *Pathway for Readiness*
4. College and Career Readiness (CCR) target ranges can be replaced with custom target ranges
5. Grade range can be adjusted down to as few as 2 consecutive grades

Empower Educators and Families With Tailored Insights

Every learner's journey is unique, and by giving you the ability to customize targets, grade ranges, and visuals, you can deliver projections that feel personal to the educators, families, and students who rely on your solution. Options available:

- Default CCR ranges:
 - Lexile: University, Community College, Workplace Readiness
 - Quantile: Limited, Fundamental, Advanced CCR
- Client-provided custom targets (up to 3) with custom labels
- Recommended Growth Path indicator when trajectories fall outside readiness ranges

Learn More

MetaMetrics is an award-winning edtech company that provides the global standard for measuring literacy and numeracy. Lexile and Quantile measures increase engagement with learning across the education ecosystem, inspiring everyone to build life skills for a brighter tomorrow.
